

OLYMPUS®

AU2700™

The Olympus AU2700 Chemistry Immuno Analyzer

***Designed for the
high volume laboratory***

Streamlining the diverse chemistry-immuno testing needs of the high volume laboratory, the fully automated random access Olympus AU2700 combines powerful high speed performance with the efficiency, economy and ease of use of Olympus AU400 and AU640 systems. Performing up to 2,133 tests per hour and using the 122-test menu for unbeatable test consolidation, the Olympus AU2700 offers unmatched flexibility to meet the needs of the

core laboratory as a high volume primary analyzer with rapid response.

The Olympus AU2700 Chemistry Immuno Analyzer

The Olympus AU2700 provides proven technology for the demanding environment of the high volume laboratory. Designed to meet your needs as a primary analyzer with a broad 122-test menu, the AU2700

features rapid STAT turn-around, true random access testing, and pediatric sampling. This high speed analyzer can process general, urine, CSF and STAT chemistries, serum proteins, thyroid assays, thera-

peutic drugs and drugs of abuse.

Compatible standardization between Olympus models include identical user-interfaces, standardized results and reference ranges and the same reagents, consumables and parts for the lowest cost per reportable in the healthcare market today. The AU2700 provides flexible cost-effective solutions for busy laboratories.

AU2700™

- **Consolidated platform with proven technology and compatible standardization.** This powerful performer offers you the broadest 122-test menu in the market today, including Emit® brand applications, and the benefits from a standardized family.

- **Convenient liquid, bar-coded reagents.** OSR bar-coded reagents come ready-to-use and provide automatic on-board

inventory management, random placement, automatic bottle changeover

and automatic calibration and QC.

- **Increased walkaway with greater productivity.**

The highly automated 300 sample loading capacity and continuous feed mean less interruptions. Hands-on time is eliminated with automated repeat testing, reflex testing, and automated sample pre-dilution. System features include clot detection and probe crash prevention.

- **Simplified operation and training with Windows NT®.** Just click on the start icon for routine sample analysis – the user-friendly Windows NT platform is easy. There's on-line software for CLIA, NCCLS, and CAP compliance, along with HELP functions to move you to the relevant topic in the on-line Operator's Manual. A modem link also keeps you in touch with Olympus experts.

- **Guarantee Your CPR.** We package financial services, information technology and our laboratory expertise in our all-inclusive Cost Management Program. No surprises or hidden costs (such as cuvettes, probes, lamps, electrode replacement).

**ISO 9001
CERTIFIED**
Olympus Analyzers and
Reagents are manufactured in
